PROFESSIONAL SUMMARY

QAD Engineer at Telenity, working on VAS services across service definition, service validation, API testing, configuration, deployment, production monitoring, and issue analysis. Started with Telenity as a QAD Engineer Intern and transitioned to a full-time QAD Engineer role. Contributed to multiple services and campaigns that have been successfully taken live, supporting validation, release activities, service delivery, production readiness, and post-release checks.

EXPERIENCE

QAD Engineer – Telenity

2026 – Present

Full-time | Previously QAD Engineer Intern (6 Months)

- Started as a QAD Engineer Intern and transitioned to a full-time QAD Engineer role after completing a six-month internship.
- Work on VAS services across service definition, service validation, functional testing, API validation, configuration, deployment, and production support.
- Test APIs using Postman and validate responses against expected service behavior during service validation and release checks.
- Monitor services and analyze application logs to identify issues, investigate failures, and support troubleshooting.
- Assist with server and production deployments and support release-related activities for service changes.
- Perform functional and integration testing to verify service changes before and after deployment.
- Contributed to multiple services and campaigns that were successfully taken live, supporting validation and production readiness.
- Support production environments by checking service behavior after releases and helping identify issues that require follow-up.
- Coordinate testing and validation activities around service changes to help ensure releases are ready for production.

TECHNICAL SKILLS

API & Testing: API Testing, Postman, Functional Testing, Integration Testing

Deployment: Server Deployment, Production Deployment Support

Tools & Technologies: AWS, Git, SecureCRT, .NET (Basic)

Web Technologies: HTML, CSS, JavaScript, PHP

Programming & Database: Java, Python, SQL, C++, Bash

Core: Object-Oriented Programming (OOP), Data Structures & Algorithms (Basics)

Other: Flutter

EDUCATION

- | | |
|--|----------------------------------|
| • Master of Computer Applications (MCA)
Thapar University, Patiala | 2024 – 2026
CGPA: 9.07 |
| • Bachelor of Computer Applications (BCA)
Chitkara University, Patiala | 2021 – 2024
CGPA: 9.74 |

PROJECTS

- Hostel Trade Hub** – Student marketplace with chat & smart search
- Temporary Billing System** – Simple web application for quick bill generation
- AI Tic-Tac-Toe** – Game with AI decision logic
- Sales Data Analysis** – Python-based analysis and insights using Pandas

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation – Forage, 2025
- AWS Cloud Practitioner – Amazon Web Services, 2025
- AWS Academy Graduate – Microservices and CI/CD Pipeline Builder, 2025
